

RoHS3 Certificate of Compliance

The revised RoHS Directive 2011/65 / EU as well as the changes of the RoHS Directive (EU) 2015/863 and (EU) 2017/2102 restricts the maximum concentration of substances classified as hazardous substances (listed below) in electrical and electronic equipment.

Based on the information provided by our suppliers, and to the best of our knowledge, we can designate that the products listed below are RoHS3 Compliant and conform to the European Restrictions of the use of Hazardous Substances. The assurance of conformity applies to all goods delivered after the warranty date. Confirmation of compliance status by our suppliers is either, because the products do not contain any of the restricted substances of the RoHS Directive at concentrations in excess of those permitted under the Directive or because removal of the restricted substances is not technically possible and their existence in the products at levels in excess of these concentrations is allowed as one of the particular applications listed in the Annex to the RoHS Directive.

For these purposes, the maximum concentration values of the restricted by weight are:

Cadmium	0,01%
Lead	0,1%
Mercury	0,1%
Hexavalent Chromium	0,1%
Poly Brominated Biphenyls	0,1%
Poly Brominated Diphenyl Ethers	0,1%
Bis(2-ethylhexyl)phtalate	0,1%
Benzylbutylphtalat	0,1%
Dibutylphtalat	0,1%
Diisobutylphtalat	0,1%

We assure, that all necessary measures have been carried out to check and confirm the insurance of the supplier

All relevant documents were stored on verifiable way.
